Bo's Learning Club: Suggestions and the solar system

Lesson 5-1
Book pages 102-105

💡 **Big idea:** We make **suggestions** (What shall we do? How about...? Let's...) and read about **the planets in our solar system**.

🎯 **I will learn:**
- Make suggestions with What about / How about + -ing
- Answer suggestions
- Name the planets
- Read facts about the solar system

📖 Key words

How about...? ما رأيك في...؟	**Let's** هيا بنا	**Shall we...?** هل نقوم بـ...؟	**build a robot** يبني روبوتًا
make a rocket يصنع صاروخًا	**go round** يدور حول	**Jupiter** المشتري	**Saturn** زحل
Mars المريخ	**ring** حلقة		

Making suggestions

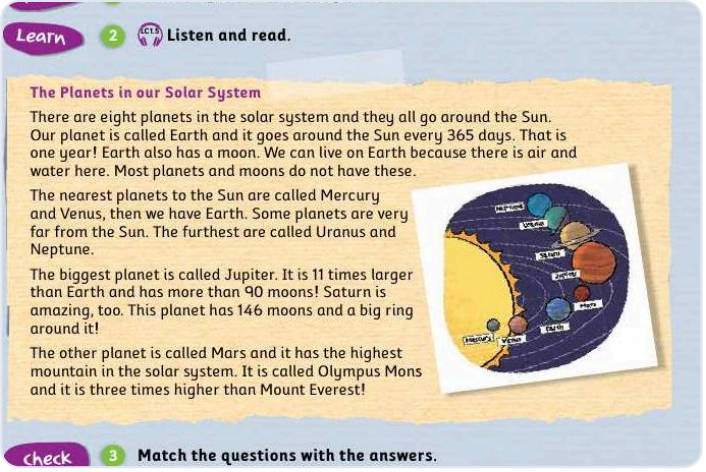

- What shall we do today?
- How about visit**ing** a museum? What about build**ing** a robot?
- That's a great idea! I love robots.
- Let's visit the toy shop then!
- No, I don't like... / No, I'm not good at...

The planets

- There are **eight** planets and they all go around the Sun.
- Earth goes around the Sun every 365 days, that is one year.
- We can live on Earth because there is **air and water**.
- Nearest planets to the Sun: Mercury and Venus
- Farthest: Uranus and Neptune

Planet facts

- **Jupiter** is the biggest planet, 11 times larger than Earth, with more than 90 moons.
- **Saturn** has 146 moons and a big ring.
- **Mars** has the highest mountain in the solar system: Olympus Mons.
- Mars is the smallest planet after Mercury and has two moons.

Learn 2 Listen and read.

The Planets in our Solar System

There are eight planets in the solar system and they all go around the Sun. Our planet is called Earth and it goes around the Sun every 365 days. That is one year! Earth also has a moon. We can live on Earth because there is air and water here. Most planets and moons do not have these.

The nearest planets to the Sun are called Mercury and Venus, then we have Earth. Some planets are very far from the Sun. The furthest are called Uranus and Neptune.

The biggest planet is called Jupiter. It is 11 times larger than Earth and has more than 90 moons! Saturn is amazing, too. This planet has 146 moons and a big ring around it!

The other planet is called Mars and it has the highest mountain in the solar system. It is called Olympus Mons and it is three times higher than Mount Everest!

Check 3 Match the questions with the answers.

The planets in our solar system

✏️ Examples

Suggest building a robot

Answer: How about building a robot?

How many planets are there in the solar system?

Answer: There are eight.

⭐ Remember

- How about / What about + verb-ing ، Let's + base verb

⚠️ Watch out

- Say 'How about visiting', not 'How about visit'.

🧩 **Activity:** Make a fact file about a planet: name, size, distance from the Sun, number of moons, fun fact

✅ Check yourself

1. How many planets?
2. Biggest planet?
3. Why can we live on Earth?
4. Let's ___ (visit) the shop.

Answers: (1) eight ، (2) Jupiter ، (3) There is air and water. ، (4) visit
