Theme 4: Innovation

Virtual Reality + Indirect Questions

Lesson 4-4
Book pages 56-57

💡 **Big idea:** **Virtual reality** is an interactive computer environment that can copy the real world or create fictional worlds. We use **indirect questions** to ask politely.

🎯 **I will learn:**
- Talk about the uses and limitations of virtual reality
- Practise indirect questions
- Use strategies to make listening easier

📖 Key words

interactive تفاعلي	**fictional** خيالي	**limitation** قيد / حدود
CAD (Computer Assisted Design) التصميم بمساعدة الحاسوب	**simulate** يحاكي	**adverbs of frequency** ظروف التكرار

Virtual reality

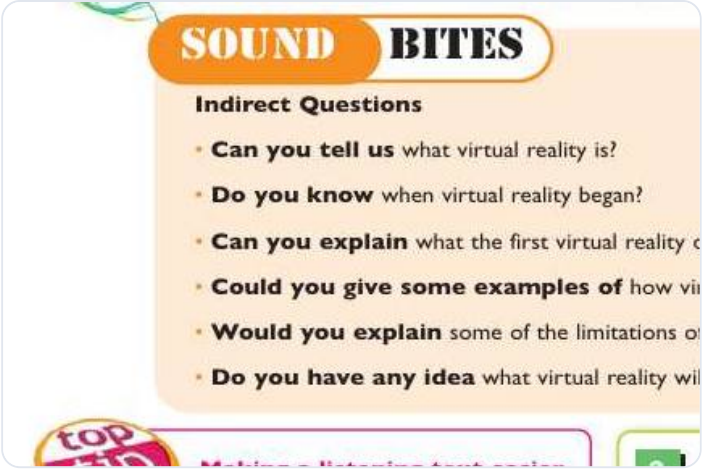

- Uses: training pilots and doctors, virtual museum tours, designing buildings with CAD
- Fictional worlds: computer games
- Limitations: hard to make it feel real
- computers and the Internet are not yet powerful enough

Indirect questions

- Can you tell me what virtual reality is?
- Do you know when virtual reality began?
- Could you give some examples of how it is used?
- Word order: question phrase + subject + verb

Listening tips

- Think about the topic before listening
- Listen for the information you want
- Don't expect to understand everything

Sound Bites: Indirect Questions (p.57)

✏️ Examples

Make indirect: "Where is the museum?"

Answer: Can you tell me where the museum is?

⭐ Remember

- In indirect questions the verb comes after the subject: "where the museum is", not "where is the museum".

⚠️ Watch out

- "Do you know where is the station?" → "Do you know where the station is?"

🧩 **Activity:** Interview a partner about computer use with five indirect questions.

✅ Check yourself

1. Give a use of VR
2. What is CAD?
3. Correct: "Can you tell me what time it is?"

Answers: (1) Training pilots ، (2) Computer Assisted Design ، (3) Yes, correct
