Unit 3: Renewable Energy

Project: An invention powered by renewable energy

Lesson 3-5
Book pages 34-35

💡 **Big idea:** Ali's team presents **The Solar Case**, a phone cover with a **solar panel** that charges your phone anywhere. We learn presentation phrases, then **design our own invention** powered by renewable energy and **present** it to the class.

🎯 **I will learn:**
- Match presentation slides to extracts
- Learn useful phrases for presentations
- Plan an invention with a group
- Give a clear presentation with good tips

📖 Key words

invention اختراع	**solar panel** لوح شمسي	**battery** بطارية	**cable** سلك
charge يشحن	**protective cover** غطاء واقٍ	**eye contact** تواصل بصري	**body language** لغة الجسد

The Solar Case

- **Problem**: running out of battery while you are out
- **Solution**: a solar-powered phone case
- **How it works**: solar panel → battery stores electricity → small cable connects to the phone
- **Advantages**: eco-friendly, protects your phone, charge anywhere, no need for a charger

Presentation phrases

- Good morning, everyone. Welcome to our presentation about ...
- This is the problem that inspired our design
- Our invention has two purposes. Firstly, ... Secondly, ...
- The main advantage of our invention is ...
- Thank you for listening. Does anyone have any questions?

Tips for giving presentations

- Practise before the presentation
- Use notes but do not read from slides
- Speak clearly and pause regularly
- Keep it simple
- Have open body language, relax and smile
- Make eye contact with the audience

The Solar Case and tips for presentations

✏️ Examples

Write an opening line for a presentation

Answer: Good morning, everyone. Welcome to our presentation about our solar fan.

How does the Solar Case work?

Answer: A solar panel turns sunlight into electricity, which is stored in a battery and passed to the phone by a cable.

Name two presentation tips

Answer: Make eye contact and do not read from slides.

⭐ Remember

- Plan with seven questions: What is it? What problem does it solve? What energy? How does it work? Advantages? Disadvantages? Name?
- Every group member should speak

⚠️ Watch out

- ✗ Reading every word from the slides ✓ Using short notes
- ✗ Thank you for listen. ✓ Thank you for listening.

🧩 **Activity:** Design an invention powered by renewable energy and draw a poster

✅ Check yourself

1. What problem does the Solar Case solve?
2. Where is electricity stored?
3. One body-language tip?

Answers: (1) running out of phone battery ، (2) in the battery ، (3) smile and make eye contact
