The future is now: Reading – The future of entertainment

Lesson 3-1
Book pages 37-39

💡 **Big idea:** **Artificial Intelligence (AI)** is changing entertainment: smart TVs recommend films, viewers choose different endings, virtual characters appear on social media, and anyone can make films with AI. But AI also brings **challenges**, and we will still need real people's creativity.

🎯 **I will learn:**
- Skim-read a text quickly
- Complete a gapped text with missing sentences
- Learn words about technology and entertainment
- Discuss good and bad changes AI may bring

📖 Key words

artificial intelligence (AI) الذكاء الاصطناعي	**transform** يُغيّر جذريًا	**recommend** يوصي / يقترح	**virtual** افتراضي
interactive تفاعلي	**hologram** صورة ثلاثية الأبعاد	**platform** منصة	**challenge** تحدٍّ
creative مبدع	**preference** تفضيل		

The future of entertainment

- AI is transforming the world of entertainment
- Online platforms use AI to recommend films we might like
- Some online movie services let viewers choose between different endings
- Virtual characters on social media are created with AI
- Soon you'll be able to produce films with simple tools

Challenges

- Some people worry that AI could replace human jobs in entertainment
- We will still need actors because AI cannot create everything
- The key is the ability of humans to work creatively with AI

Study tip: gapped text

- Read the text quickly first to understand what it is about
- Move your eyes across the text to pick out key words
- Read the first one or two lines in each paragraph
- Check the sentences before and after each gap

Useful words from the text

- transform = change something completely
- regularly = very often
- preference = something that you like more than others
- version = one form of something, different to others
- produce = make something

The future of entertainment (article)

✏️ Examples

What does recommend mean?

Answer: to suggest something that someone might like

Is AI always good for entertainment?

Answer: No. It brings exciting changes, but people worry it could replace human jobs.

⭐ Remember

- Skim = read quickly for the general idea. Scan = look for specific information.
- Animated films have a 30 percent higher profit margin than those with real actors.

⚠️ Watch out

- Filling a gap with a sentence that has the same words but doesn't fit the meaning. Check the ideas before and after the gap.

🧩 **Activity:** Agree on one change in the article you think is good and one that is not good, and explain why

✅ Check yourself

1. What does AI stand for?
2. What does virtual mean?
3. Name one challenge of AI

Answers: (1) Artificial Intelligence ، (2) not real, made by computers ، (3) it could replace human jobs
